

# **Physics**

## Introductory task for year 12 Physics

Complete some research into an area in Physics that interests YOU. Download and review the specification content for your course. You will present (3-5mins) on this within the first two weeks of the course using the following headings:

1. Outline/summary of the topic and why you chose it.
2. What specifically do you find interesting about this topic.
3. The impact of this area of Physics on the world today.
4. Where do you think this area may be relevant (make links) in the two year course of Advanced level Physics?

Suggested reading attached.

Optional Transition booklet attached complete with answers.
